Our evening tuition centers function from 5.00pm to 7.00pm, the children are helped to understand and learn the subjects without fear, while the other children are assisted in completing their home work and getting their doubts about the day's session cleared.

The centers conduct periodic performance appraisal programs among the children, where their performance is evaluated through short tests.

In cases where fees have to be paid, that too is taken care by us. In this education curriculum, we have planned to include art and craft classes, through this we hope to identify their natural talent and help develop it.

Study material, art and craft material is provided to all children equally, thus enabling every child to participate in all activities.

Only a child who has enough nourishment can study well. We too, have covered this aspect. The children are provided with a snack and a cup of milk.

The outcome of this endeavor is that these children will be given a chance to move into the world with more confidence. Move out from an atmosphere that continuously threatens to bog them down and make them into next generation useless parents. Education will ensure freedom to live life on their terms.

Although the area we are working in on education, invisibly we will be working on the child development. Good performance in school will automatically increase the child's self-esteem. Constantly speaking politely and in the correct way will make them better mannered. Their behavioral pattern will change. The way they dress, speak, personal hygiene etc., will definitely undergo a visible change. Besides this we target and work on the parents via counseling, occasionally. So ultimately, our approach, though small, will be wholistic.

EDUCATION

Be thoughtful, extend yourself,

`TEACH A PERSON TO FISH RATHER THAN GIVE HIM A FISH` – a very well known, and oft-used Chinese saying. The easiest way in which one can take care of the 'DHARMA' aspect in our lives is to give away some money to Charitable Organizations or to known poor persons.

Would you like to do something **different?? Better??** Something that after a certain period will bear remarkable results: -

In the life of the child - goes to school, and is encouraged to remain till it receives the basic education. [std. 10 plus 2]

In society - a better society in all aspects, with more literate persons.

In your life - the satisfaction of being the catalyst for the above.

Education gives person self-confidence, which is crucial for survival and growth.

Adult literacy

One of the ways a society can develop the fastest is to work towards the upliftment of its women. By upliftment meant, we should mean to take a holistic view. Getting them involved into Self Help Groups alone will not help, neither by getting them to belong to one group or another for financial freedom. We have to first and foremost find out that factor, which, when utilized, will ensure that all the rest automatically falls in place. What is this Factor...**"EDUCATION"**.

Based on a recent survey conducted in 5 slums in Trichy, it was found that more than 80% of the women folk belong to the age group of 25 - 45 were illiterate. Beyond this age group the percentage was higher.

Given the Indian scenario, where the woman is the focal point of the family, with the spokes dependant on her, it would be but logical to pay attention to her. We have devised a syllabus wherein the lady attends an hour of class per day between 7 pm and 8 pm. This will ensure that she becomes a basic literate person. Later, we intend to incorporate health education in this program.

The same agenda has been drawn up for the men folk of the community with timings slotted for the evening.

Youth Empowerment - Life coping skills

An extensive survey in 3 backward areas (Slums) showed up statistics that said most of our young energy here was wasted.

- They did not have adequate education
- They have no doubts about facing a sure depressing future
- Almost all were on top of smoking-from humble Beedi / Cigarettes to ...
.....
- Plus betel nut, Paan, Zarda, Supari and liquor.
- Not one held a permanent job, SURPRISE!!!! They did not want one.
- They could handle coolie jobs like painting, basic carpentry, masonry work, load carrying, any job that would ensure wages at the end of the day, maybe or maybe not they would work the next day.

After a few intensive meetings with the youth both boys and girls (separately) we have been able to get them to agree to attend a youth club (name chosen to sound attractive). A curriculum has been formulated wherein they would be able to brush up their forgotten education (if any) in the first hour, the second hour would be devoted to hygiene both personal and social, awareness on dangerous communicable diseases and preventions priority given to HIV/AIDS. The third hour would get them trained in one skill or other selected by them, which would ensure that they get a suitable placement in reputed companies with a job security. This curriculum has been finalized with the help of experts. Potential employers have been identified. So what's stopping us? FUNDS. Why do we need funds? For manpower...

Education - Experienced teachers to teach Tamil and basic spoken English.....

Health - Doctors, Nurses and teachers of biological science and nutritionists.....

Skill - Experienced skilled personnel who can impart skill training to ensure them a job. From there they can hone their skills on the work floor.....
